**Wormall Civil Staff
Milestones**

Hello all,

As I sit down to write this message and reflect upon the events that have occurred since the last issue, it is unfortunate that the most recent event that comes to mind is my footy team going down to Geelong and concluding our 2019 season.

Oh well, that's footy and despite the result as I look back it pleases me to remember many good times, with a bunch of great people in our fantastic Optus Stadium. On a positive note, congratulations to the Richmond football club and their very proud supporters on yet another premiership.

October is upon us and so to is a very special date for us with the official celebration of Wormall Civil' 35 Years of service to the WA Land Development sector. Thank you to everyone who was able to join us for a night of celebrations, it truly was a wonderful night! I look forward to many more milestones along the way with you all.

In preparation for the event, for the past month there has been a lot of action in and around all areas of our business for the production of our new corporate video. I feel I must also note that our teams on site were graced with the presence of none other than our very own 'in house' film maker, Mr George Lucas (aka Mike Mulhall) as he led a cast of talent, staff and film crews... on a serious note though well done to Mike and all that played a part to make it all happen!!

I know that many of our Dirt readers are keen to follow the progress of our mission to introduce our infamous Poo Pit™ (Sewerage Maintenance Shaft) to the North American market. Well it is with a great level of pride and excitement that I can now announce that the product has been very well accepted following the successful installation of the very first Poo Pit™ in Canada, the installation has been done within the City of Windsor, Ontario. Personally, after almost 2 decades of promoting this product to Water Regulating Authorities in many regions, I must say that it has been very refreshing to deal with the team at the City of Windsor with such a willingness to adopt embrace change to achieve better outcomes.

Congratulations to the organisers of the 2019 UDIA (WA) Gala Dinner and Awards for Excellence. I would also like to acknowledge the award recipients & congratulate you and your team on your efforts to make it possible. It was a fantastic evening and one to remember.

Good luck in all you do and stay safe.

Feature Project: Kemerton Industrial Estate

Name of Project: Kemerton Industrial Estate – Earthworks, Roads, Drainage (Entry roads into Albermarle Lithium Plant)

Client: LandCorp

Client Consulting Engineer: Calibre Consulting

Wormall Civil Project Manager: Mike O'Donoghue

Wormall Civil Site Supervisor: Jason Mitchell

The Kemerton Strategic Industrial Area (SIA) is an important strategic industrial estate for the South West and links to the Bunbury Port by road, with land reserved for future rail connection if required. The Department of Jobs, Tourism, Science and Innovation is the lead agency for the development of the Kemerton SIA and LandCorp is the estate manager for the LandCorp owned land. The SIA is located approximately 17km north east of the Bunbury CBD and 160 km south of Perth. As a vital component of the estate, Wormall Civil is constructing the roads that will provide the key access point into Albermarle's \$1 billion Lithium Plant in Western Australia. The Lithium Plant project has created 500 construction jobs and will create a further 500 jobs once it is fully operational. We are proud to have been selected as the civil contractor of choice on yet another high profile, state government funded project, through their land development agency LandCorp.

Project scope:

Earthworks involved 100,00m3 of cut to fill including treatment of Acid Sulphate Soil and groundwater on site and 30,000m3 of imported fill. 2km of power cable installed as part of the power reticulation system. 1km of drainage pipe including pipe sizes ranging from 300mm to 1200m diameter. The drainage works also involved the installation and extension of existing drainage culverts on existing Marriott Road under live traffic conditions including two large cast in-situ headwalls 1,500m2 of rock pitching at drainage outlet structures. Over 3 hectares of wetland swales and roadside swales shaped to earthwork design contours. 3.8km of roads including two new roads, widening of existing Marriott Road and two road realignments on Wellesey Road North intersections. The roadworks involved the import of 13,000 tonnes of limestone and 22,000 tonnes of gravel. 5.5km of fencing installation.

Wormall Civil: Registered Training Organisation

Our Registered Training Organisation, Wormall Civil Training commenced operations in 2016 with the aim of encouraging local youth to pursue careers in the civil engineering and construction industries and ensure they are job ready upon completion of their year 12 studies.

We are pleased to look back on the last four years as a huge success in providing students with nationally accredited qualifications, employment and industry experience which has allowed them to achieve career goals.

To date, the RTO has provided training to almost 200 personnel and successfully provided 11 local school students with full time employment along with various traineeship and apprenticeship opportunities within the company.

We would like to thank everyone involved for their efforts, including site supervisors for making their projects available for work placement when needed and everyone who has assisted in providing a positive learning environment within the company.

Our graduating students of 2017

The Wormall Civil team had a great night at the UDIA Awards for Excellence 2019. Catherine being the rose amongst the thorns here. Congratulations to all the finalists and winners.

L-R Justin Fitzpatrick, Daniel Strickland, Daniel R Strickland, Tinus Spangenberg, Mike Mulhall, Catherine Cunningham, William Wallace, Dave Foord, Shane Wormall, Shane Hosking

Wormall Civil: Dewatering Capabilities

Wormall Civil are proud to announce that we have added another two services to our already extensive in-house capabilities, namely, dewatering and horizontal drilling.

Having our own highly experienced teams in this new business unit will allow us to have the in-house capability to implement ground water control and carry out horizontal drilling activities in our ever expanding list of projects we are undertaking.

This is especially important during deep utility services installations and will assist us in ensuring that we meet all environmental requirements, project and client goals.

To date Wormall Civil’s dewatering team have completed works at our Muchea and Providence projects. Our dewatering team pride themselves on the ability to work alongside our project management personnel and all site staff to provide quality services to benefit not only the projects but the company as a whole.

Our dewatering team is backed with a fleet of vacuum pumps, dewatering pumps, groundwater dosing/treatment units and approximately 1500m of high-pressure hose with the ability to set-up and implement numerous dewatering systems at any one time.

Our B750 Pilot Tube Micro Tunnelling machine can provide up to 50,000kg/110,000lb of thrust and can drill up to 60 meters at a time while using purpose-built PVC boring pipe to install sewer utilities where open excavation is not an option due to practicality, environmental or safety issues.

We are proud to have Dean Richter, Craig Douglas and his experienced and knowledgeable crew behind this new business unit on board and to embed our equipment and capabilities into our existing and future projects.

Introducing Wormall Civil Team Member Roxley Penney, HSE Advisor

How long have you been working with Wormall Civil?
I have been at Wormall Civil for just over 6 years

What does your job entail?
I am primarily responsible for the day to day HSE on our projects. I also have a hand in QA, HR and IT, particularly SharePoint

What do you like most about your job?
The daily challenges make the day stressful at times but there’s satisfaction in coming up with solutions that help others

What do you like to do when you aren’t working?
When I’m not running the kids around to sport or work, I like to go hiking or relax with a movie

What’s a fun fact about you many people may not know?
I’m a bit of a nerd. I collect vintage Transformers and Masters of the Universe. I have 100’s of figures

Favorite holiday destination?
I’m pretty happy when I’m in the USA, particularly Nashville or anywhere in Colorado

Project Updates:

Wormall Civil would like to thank all of our valued clients. With the end of a successful 2018 – 2019 we now look forward to continued success this financial year. To date since June 30, Wormall Civil has been awarded many exciting projects, some of which include;

- Banksia Grove 2019 – 2020 term contract
 - Madora Bay Stage 7
 - One71 Baldivis
 - RHLP Stage 3
 - Peel Business Park Civils Stage 1
 - Glendalough Development
- The Village Wellard
 - Heron Park Stage 29
 - Flamewood Brabham Stage 7
 - Vivente Stage 5
 - Karmara – Lot 100 Armadale Road

Wormall Civil Celebrate 35 Years of Operation

Wormall Civil's 35th Anniversary Event at Crown Towers Ballroom Friday 11th October, 2019.

Oh what a night, indeed it was! A very fitting celebration of this proud, family owned, West Australian civil engineering construction company's 35 years of operations.

From humble beginnings back in 1984 when Ray and Sue Wormall along with Sue's Dad, Ray Goatley (dec), took an almighty leap of faith and purchased their first backhoe, 'Big Red', with a rather sizeable loan and a handful of employees launched Wormall Contracting.

Initially commencing operations as an underground subcontractor the company has grown exponentially over the last 35 years to be a major force in the WA civil contracting sector as a main contractor.

Our 35th event was attended by approximately 260 people, including many dignitaries, government and private land developer clients, consultants, local authorities, staff and family, sub-contractors and suppliers. To see so many people, both internally and externally, who have contributed to our ongoing success was a huge thing for us to witness and also very humbling. It was a big night (and for some an even bigger morning) as festivities continued at the Groove Bar in the casino for some hours post the official function.

We also released our new corporate video and our new web page on the night to a very appreciative and attentive audience.

Thank you to all who attended and made it a night to remember.
We look forward to many more years of working together with you all and celebrating many more milestones along the way!

Wormall Civil Celebrate 35 Years of Operation

Wormall Civil Community Involvement

Wormall Civil are proud sponsors and supporters of Blake Sabaan as he headed to Tasmania to play in the WA Under 16's Football team.

Blake currently plays for Bassendean Football Club and also plays for East Perth future 16's and he is only turning 15 this year- so already, he is a grade up and excelling!

The WA Under 16's team headed to Tasmania where they took on Tasmania, NT, South Australia and New South Wales in the bronze medal shoot out.

Blake was picking up on average 15 disposals per game. WA walked away with the bronze medal after losing to South Australia, after a goal was kicked after the siren. We would like to wish Blake all the best for a successful football career.

L-R, WA Under 16's team for 2019 and Blake receiving his jumper from Mark Hutchings

Wormall Civil are proud sponsors of the Stirling Saints Junior Football Club. Congratulations to the Year 8 team on winning their first Premiership. Stirling Saints played in the top division.

They play in the Northern Conference which features Claremont, Subiaco and West Perth. Making the win even more special for the year 8 team. Well done, and wishing you the best of luck for next year!
